

GMP made interesting – a highly interactive, educational and enjoyable one day GMP course.

This highly educational and engaging Good Manufacturing Practice course covers the key requirements of GMP and how these are applied in the workplace.

Do you need to learn about GMP and how it is applied in a manufacturing operation? Are you in a new Supervisory/ Management role and need a detailed explanation of GMP, its requirements and how it works? Are you involved in GMP training and in need of tips on how to make GMP training fun and interesting? If so, this is the course for you.

Who will the course benefit?

Our GMP course is aimed principally at personnel new to Supervisory and Management roles who need a detailed explanation of GMP, its requirements and how it works. The GMP course will also be of benefit for anyone new to pharmaceuticals who have had no significant GMP training previously.

Course overview:

Delegates will learn about GMP and how it is applied in a manufacturing operation. Delegates will leave the GMP course with a clear understanding of the requirements of EU GMP and an appreciation of USA GMP.

Expert Tutors: **Andy Martin**

Andy started working in the Pharmaceutical industry in 1985 as a lab technician for Smith & Nephew. Following this he had a number of roles culminating when he took over as QA Microbiology Manager. In 2003 he moved into Pharmaceutical Training and then in 2007 he moved back into Microbiology when he took up the position of Microbiology Manager for Catalent Pharma Solutions. Since 2012 he has operated as a consultant specialising in Microbiology and Quality Systems.

Dominic Parry

Dominic has worked in the pharmaceutical industry since 1992, and is a leading pharmaceutical quality management specialist. He is generally recognised as one of the leading GMP trainers in the UK and brings an enormous amount of interest, enthusiasm and fun into the training he presents.

Course contents:

- An introduction to GMP
- The history of GMP
- Why do we have GMP in pharmaceuticals?
- Licences for medicines and GMP enforcement
- GMP in the Product Lifecycle
- The legal status of GMP
- The structure of the EU Guide to GMP / The UK Orange Guide
- GMP in the USA
- Current and future issues in GMP
- Duties of key personnel and departments
- The role of Production, Quality Control (QC), Quality Assurance (QA) and the Qualified Person (QP)
- The principle GMP requirements for documentation and records
- GMP in the workplace
- GMP and documentation
- People, training and hygiene
- Data integrity
- Dealing with problems and root-cause analysis
