

Gain an appreciation of the main requirements of Good Manufacturing Practice in an hour with this online GMP course!

This GMP online course is aimed at new starters and existing staff as part of their ongoing GMP training. The GMP online course provides a detailed overview of why we have GMP and what GMP is in three CORE chapters with ADDITIONAL chapters covering specific GMP requirements for different parts of the site. Versions available include:

GMP for Manufacturing Personnel
GMP for Packaging Personnel
GMP for Warehousing Personnel
GMP for Laboratory Personnel.

Who will the course benefit?

We offer a series of online modules that are used for GMP compliance training, or as part of a GMP induction programme to introduce new starters to Good Manufacturing Practice. These modules can also be used as part of on-going GMP refresher training for existing personnel. In addition, the courseware can be customised, if required, for your site or company. And, can be purchased for use on your own internal systems.

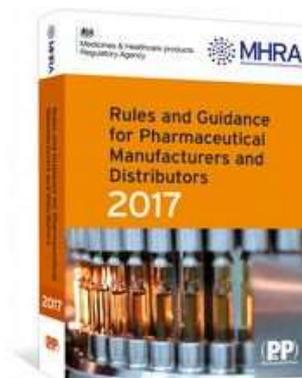

Benefits of this approach include:

- Access at any time (day or night)
- Access via any computer, tablet or iPhone
- Built-in assessment questions and pass-mark
- Provides data for your compliance programme
- Materials kept current and up-to-date as legislation changes
- No need for an on-site trainer
- Short modules with specific topics
- Learners undertake modules relevant to their role
- Whether there is a large group to be trained or just a few individuals it is very cost effective
- Also available for inhouse purchase
- Approved by the Royal Society of Chemistry
- Every learner who completes the course can download a Certificate with our logo and the RSC Approved Training logo.

ACCESS ANYTIME ANYWHERE

Course contents:

Typically delegates do all three CORE chapters and any ADDITIONAL chapters that are relevant to their role (see below). For example, a person working in the Packaging department will undertake Chapters 1 to 3 and Chapter 6. The duration of each chapter lasts approximately 10 – 15 minutes. **The standard 4 chapter course should last about an hour.**

CORE CHAPTERS:

The CORE chapters shown below are available either as a UK or non-UK version. The UK version has references to the UK's Regulatory Authority (the MHRA) and their "Orange Guide", whereas the non-UK version does not.

Chapter 1: An introduction to the pharmaceutical industry

This chapter provides an overview of the pharmaceutical industry and the need to regulate medicine manufacture and supply.

Chapter 2: An introduction to Good Manufacturing Practice

This chapter introduces the concept of Manufacturing Authorisations for sites and Marketing Authorisations for medicines and the need for GMP at sites making pharmaceuticals.

Chapter 3: The Good Manufacturing Practice guidelines:

The main contents and requirements of the 9 chapters of European Union GMP (EU GMP) are explained and why these are important. Reference is also made to the additional requirements in the Annexes of EU GMP.

ADDITIONAL CHAPTERS:

These are specific for different parts of the site, and typically a delegate will also take one of these, depending on which area they work in. If you would like further details on the specific contents of each chapter and the suitability for the individual then please contact us.

Chapter 4: GMP in the Warehouse

This chapter covers the key GMP requirements for the warehouse and is designed for people working in good-in or despatch.

Chapter 5: GMP in Manufacturing

This chapter covers the key GMP requirements for manufacturing and is designed for people working in manufacturing areas.

Chapter 6: GMP in Packaging:

This chapter covers the key GMP requirements for packaging and is designed for people working in packaging.

Chapter 7: GMP in the Laboratory

This chapter covers the key GMP requirements for the Quality Control laboratory and is designed for people working in the laboratory..

Assessment and certificates:

Each chapter has a series of randomly selected assessment quiz questions at the end of each one. An 80% pass mark is expected. Guidance is provided if a delegate gets an answer wrong. After successful completion of the course, a certificate is available for download by the delegate and/or the team administrator. **ONLINE:** Available Anytime Anywhere using a desktop pc, laptop, tablet and most smartphones.

Course feedback:

This **highly praised course** has been undertaken by individuals, small groups and by major organisations of up to 500 people. Some of the UK's largest Pharma organisations have also purchased the courseware for their internal use. **Delegate feedback is outstanding**, and can be seen on reviews.io – an independent review website. Here is a small selection:

Ellen D ★★★★★

" The course is clear, and well presented with audio and visual aids. The module selections are great to enable the training to be tailored to each department, and the incorporation of the laboratory module was perfect for QC. The interactive quiz at the end of each module ensures that all employees have fully engaged within the training. The training management software is fantastic and allows for full oversight of the status of all participants. I would recommend this training package as a basic induction to GMP or as an annual refresher training programme. "

Hemen G ★★★★★

" Very good course to learn for new starter who wants to work under GMP standards. Explain well in details. "

George ★★★★★

" I just finished the online GMP course. It was a good learning experience as an introduction to the GMP requirements. Would definitely recommend it. "

James K ★★★★★

" I found the core course, and additional modules, to be a comprehensive introduction or refresher training surrounding the EU GMP requirements. "

Rachel B ★★★★★

" Very easy to follow and informative course "

Online Good Manufacturing Practice training course

Pricing and Availability:

Individuals or Small Groups

Learners simply need their desktop pc, a laptop, a tablet or even a smartphone and access to the internet to undertake these courses. This will enable them to access the course ANYTIME ANYWHERE.

The individual price for access to the three CORE chapters and one ADDITIONAL chapter is **£95**. Extra additional chapters are charged at **£25 each**.

Delegates will have access to the course for a **2-month period** from the registration of the delegate. If they do not complete the course within this time then they will need to pay again to complete the course. No certificate is issued if the course is not completed in full.

If you would like to book onto the course as an individual delegate, then please **visit our website**. Course registration will follow soon after payment has been received.

Groups

Discounts are available for groups of 10 or above and the discount increases depending on numbers. Please contact us for further information.

License materials for your internal system:

If you are interested in licensing the course materials for use on your own Learning Management Systems (LMS) then please contact us to discuss options. The courseware is available in the following formats: SCORM 1.2, SCORM 2004, AICC and the Tin Can API.

Data Integrity online course – also available – contact us or visit our website for more details

Payment and cancellations:

Full payment must be made before you or your team will be given access to the online learning. Payments will only be refunded in full if cancelled in writing 4 weeks and provided you or any of your team have not started the course. A taster course is available to see the style of learning in this programme – see our website for details on how to access.
